MOONLIGHT
THIS IS THE STORY OF A LIFETIME

THINK ABOUT THIS...

How did Juan's influence on Chiron make him feel about his identity?

How does Chiron's environment affect his expression?

How did Kevin's return impact his identity?

BEHIND THE SCENES

The film is based on the unproduced play "In Moonlight Black Boys Look Blue" by MacArthur Fellow Tarell Alvin McCraney.

This is the first LGBT film, and the first film featuring an all-black cast, to win the Academy Award for Best Picture.

Moonlight focuses on the intersections of blackness, masculinity, and vulnerability.
